Closing Equity Gaps in DC's Wards and Neighborhoods

Technical Appendix

Leah Hendey and Yipeng Su

Revised June 2019

This technical appendix accompanies the interactive tool "DC Equity Gaps Tool: Closing Equity Gaps in DC's Wards and Neighborhoods" and provides detailed explanations of the indicators and their data sources. The tool provides data for the District of Columbia at the city level, for the 8 council wards, and for 43 neighborhood clusters. Neighborhood clusters are defined by the DC Office of Planning and are used for planning and related purpose. Neighborhood clusters 42 (Observatory Circle), 45 (National Mall, Potomac River), and 46 (Arboretum, Anacostia River) are not displayed because they have fewer than 200 people or 200 housing units.

Some of the source data are provided to or obtained by Urban–Greater DC for geographic areas, such as census tracts and census block groups, that do not line up perfectly with DC wards and neighborhood clusters. The Urban–Greater DC team mapped these data to each set of geographical boundaries using population weights to split tracts or block groups, when necessary. Consequently, for some indicators at such geographic levels, the indicators represent close approximations of the values, rather than precise counts.

Indicator Definitions

Broadband internet

This indicator is the share of households in the selected geography who have a broadband internet

subscription via cable, fiber optic, or DSL. These types of service are more likely to meet the download

speeds needed for normal internet use.²

Years: 2013-17

People above poverty

This indicator is the share of people in the selected geography whose incomes fall above the poverty

threshold, a national benchmark used to estimate how many people lack enough income to meet basic

needs.³ Poverty thresholds account for family size and composition.

Source: American Community Survey

Years: 2013-17

Children above poverty

This indicator is the share of children under age 18 whose family incomes fall above the poverty

threshold in the selected geography. Poverty thresholds account for family size and composition.

Source: American Community Survey

Years: 2013-17

Full-time workers earning a living wage

This indicator is the share of full-time workers ages 16 and older with annual earnings over \$35,000 in

the selected geography. A working adult in DC needs to earn over \$35,000 a year to have a living

wage—that is, the minimum amount he or she needs to afford basic necessities.4

Source: American Community Survey

Years: 2013-17

Family income over \$75,000 per year

This indicator is the share of family households with annual income over \$75,000 in the selected

geography. Families with incomes below \$75,000 may not be able to live in safe and decent housing,

afford quality child care, keep food on the table, and pay for medical expenses or other urgent needs. A

family household is a one with a householder living with at least one other household member who is

related to them by birth, marriage, or adoption.5

Source: American Community Survey

Years: 2013-17

Unemployment rate

This indicator is the share of people ages 16 and older in the civilian labor force who are jobless, actively

seeking work, and available to take a job.

Source: American Community Survey

Years: 2013-17

Workers with less than a 45-minute commute to work

This indicator is the share of workers ages 16 and older who spend less than 45 minutes traveling from

home to work each day—whether by car, public transportation, or some other means—in the selected

geography.

Source: American Community Survey

Years: 2013-17

Small business lending per employee

This indicator is calculated by dividing the average annual total of Community Reinvestment Act

business loans between \$10,000 and \$1,000,000 from 2014 to 2016 by the number of employees in

businesses that have less than 50 employees. Loans originated for less than \$1,000,000 and are secured

by "nonfarm or nonresidential real estate" or "commercial and industrial loans" are considered small

business loans for the purposes of reporting for the Community Reinvestment Act. The number of

private primary jobs in businesses with fewer than 50 employees from the Local Employment-

Household Dynamics Origin-Destination Statistics (LODES) Workplace Area Characteristics file in

2015 was used as a proxy for the number of small business employees.

CLOSING EQUITY GAPS IN DC'S WARDS AND NEIGHBORHOODS

Destination Statistics (LODES) Workplace Area Characteristics (2015)

Years: 2014-16

Adults with a postsecondary degree

This indicator is the share of adults 25 years and older who have earned either a two-year (associates)

or four-year degree from a college or university.

Source: American Community Survey

Years: 2013-17

People who live within one mile of a retail bank branch

This indicator is the share of population who live within one mile of a retail banking location in the

selected geography. Retail banking branches are defined as a "full service retail office" by Federal

Deposit Insurance Corporation. Population counts are as of the 2010 decennial census.

Decennial Census

Year: 2018

Premature deaths per 1,000 population

This indicator counts the number of deaths before age 75 per 1,000 people in the selected geography. It

has been adjusted by the ages of people living in a community, using the age distribution for DC overall

in 2010, so areas with older or younger populations can be compared. The premature death rates are

presented averaged over 2014 to 2016.

Years: 2014-16

Births to mothers who received adequate prenatal care

This indicator is the share of births to mothers who received adequate prenatal care during their

pregnancy. Adequate prenatal care is defined using the Kessner index. To be adequate, prenatal care

must begin at a gestational age of 13 weeks or earlier and must meet the recommended number of

visits.

Year: 2016

People who live within one mile of a major grocery store

This indicator calculates the share of population who live within one mile of a grocery store with healthy

food options in the selected geography. The DC Office of Planning determined which large or national

chain grocery stores in the District had healthy food options. The research team also included major

grocery chains in Maryland located within a mile of DC residents. Population counts are as of the 2010

decennial census.

Year: 2018

Homeownership rate

This indicator is the share of housing units that are occupied by the owner, either owned free and clear

or owned with a mortgage, in the selected geography.

Source: American Community Survey

Years: 2013-17

Households with a housing cost burden

This indicator is the share of households who pay 30 percent or more of their monthly income toward

housing costs (rent and utilities for renters or mortgage, taxes, fees, insurance, and utilities for

homeowners) in the selected geography.

Source: American Community Survey

Years: 2013-17

Home sales affordable to the average household of color

This indicator calculates the share of home sales of single-family homes and condominium units that are

affordable to first-time homebuyers in the selected geography at the average income of households

CLOSING EQUITY GAPS IN DC'S WARDS AND NEIGHBORHOODS

headed by people of color in DC, \$68,362 in 2012–16. The research team used the methodology Tong describes in a 2004 report to calculate affordability of sales. The calculations use the 2016 effective interest rate (3.69 percent) for a conventional mortgage on a single-family home in DC from the Federal Housing Finance Agency's Monthly Interest Rate Survey. The calculations assume a 10 percent down

payment for first-time homebuyers and include the cost of private mortgage insurance.

Community Survey

Year: 2017¹¹

Violent crimes per 1,000 population

This indicator counts the number of Part I violent crimes as defined by the Federal Bureau of Investigation's Uniform Crime Reporting statistics. Part I violent crimes are homicide, rape, aggravated assault, and robbery. This indicator only counts crimes that have been reported to the police. To allow for comparisons across areas with different population sizes, the indicator is reported as a rate per 1,000 people using the population for an area from the 2010 decennial census.
